WHO WE ARE

A strategic partner for organisations building what comes next.

AK Nexus is an enterprise AI and digital transformation consulting practice. We help leaders move from ambition to execution by connecting business strategy, technology decisions, and disciplined delivery.

Business-first approach	Strategy leads every technology decision. We focus on the operating, commercial, and customer outcomes that matter most.
Executive clarity	Clear roadmaps, governance, and decision-ready insight for leaders guiding complex change.
Responsible AI	Practical AI adoption supported by readiness, governance, risk awareness, and measurable use cases.
Delivery excellence	Structured PMO discipline that turns programmes into coordinated action, visibility, and results.

Our mission

To help organisations modernise operations, accelerate digital transformation, and adopt Artificial Intelligence through strategic consulting and disciplined delivery.

Five consulting practices. One integrated transformation partner.

Our capabilities work together to help organisations set direction, make confident technology decisions, and deliver meaningful change.

01

Enterprise AI Strategy

Identify practical AI opportunities and establish the strategy, governance, and roadmap for responsible adoption.

- AI strategy & readiness
- AI governance
- Executive AI advisory

02

Digital Transformation

Modernise operations and improve organisational performance through a clear transformation plan and operating model.

- Transformation strategy
- Digital roadmaps
- Change management

03

Project, Programme & PMO

Bring control, governance, and executive visibility to strategic programmes and portfolios.

- PMO setup
- Portfolio governance
- Project recovery

04

Technology Advisory

Independent, vendor-neutral guidance on cloud, architecture, platforms, and technology investment decisions.

- Technology strategy
- Cloud strategy
- Vendor evaluation

05

Intelligent Automation

Improve efficiency through workflow automation, AI agents, knowledge management, and digital productivity.

- Workflow automation
- AI agents
- Process improvement

Delivery leadership for programmes that cannot afford to drift.

AK Nexus provides governance and execution support for technology, AI, and transformation initiatives - from PMO setup to programme recovery and contract Technical PMO leadership.

Technical project management	• Scope, schedule, budget, and dependency management • Sprint and release planning • Vendor coordination and escalation management
PMO setup & governance	• Operating model, RACI, RAID, and governance cadence • Steering committee packs and action tracking • Portfolio dashboards and project health reporting
AI & digital transformation PMO	• AI, GenAI, RAG, data, and automation initiatives • Product and technology roadmap execution • Technical and business stakeholder coordination

Contract Technical PMO - UAE

For organisations that need experienced delivery leadership without adding permanent headcount.

Flexible engagement is available on-site in the UAE, hybrid, or remote for short-term delivery gaps, 3-6 month transformation initiatives, 6-12 month enterprise programmes, project-based outcomes, or fractional PMO leadership.

The blend of business context, technical fluency, and delivery tools needed to lead modern programmes.

AI & automation	AI strategy · Generative AI · AI agents · LLM / RAG delivery coordination · Workflow automation · Knowledge management
Technology	Cloud strategy · Azure · AWS · Google Cloud · SaaS · APIs · Web applications · Microsoft 365
Delivery tools	Jira · Confluence · Microsoft Copilot · Google Drive & Google Sheets · Slack · Teams · Asana · MS Project · Power BI
PMO disciplines	Governance · RAID · RACI · Capacity planning · Resource planning · Portfolio reporting · Risk and vendor management

Industries

Financial Services	Healthcare	Government	Technology
Retail & Consumer	Logistics & Supply Chain	Manufacturing	Professional Services

Why AK Nexus

Business-first, vendor-neutral, and designed for decisions that create measurable outcomes - not technology for its own sake.

From strategic intent to measurable, sustained change.

Our transformation framework adapts to the maturity, urgency, and operating reality of each organisation.

01 Discover	02 Assess	03 Strategize	04 Design
05 Implement	06 Adopt	07 Optimize	08 Scale
